

## OBJECTIVE

As one of activities within project "Eco-building International Club for advanced European Sustainable Energy Technology Dissemination in Europe and China", the EU-China Eco-Building workshop aims to promote advanced European Research & Technology Development (RTD) results and best Demonstration cases in building sector into Chinese market. This event will provide an extraordinary platform for Chinese and EU researchers, engineers, business owners, project developers, operators and government officials, to exchange information-experiences and strengthen Sino-EU cooperation in eco-building sector. Through outstanding presentations provided by European and China sectoral experts, workshop attendees will have an insight into Chinese market and EU advanced RTD results, best practices cases as well as regulations etc. The energy-efficient and renewable energy technologies, products in buildings are planned to be demonstrated.

## TOPICS

- Energy saving structure of building envelop;
- High efficient lighting, air-conditioning and ventilation systems;
- Polygeneration and renewable energy in buildings;
- Retrofit of existed buildings
- Monitoring and regulatory on energy-efficient buildings
- European advanced technologies and products as well as standards of energy-efficient buildings and others.

## PARTICIPATION FEE

- project partner: 150 Euro
- others European participants: 400 Euro for speaker; 300 for poster  
(Including a two day conference program, materials, coffees, lunches and dinners etc.)

## LANGUAGE:

- Consecutive interpretation in English / Chinese

## HOTEL

You can make reservation at Yinbin Hotel of the Yellow River Henan via <http://english.ctrip.com>
